EDUCATION

University of Toronto

Toronto, ON

Honours Bachelor of Science in Computer Science

2027

- **Relevant Coursework:** Data Structures & Analysis, Algorithm Design & Analysis, Intro to AI, Software Tools & Systems Programming, Intro to Software Engineering, Intro to Databases, Probability & Statistics

EXPERIENCE

Junior Software Developer

May 2026 – Present

JANA Corporation

Toronto, ON

- Architected **30+ automated Typescript tests** using Playwright, **cutting manual QA overhead by 30%**
- Redesigned data charts to modernize the UI and align components with corporate brand standards for **15+ clients**, using React.js with TypeScript

Software Engineer Intern

Aug 2025 – Jan 2026

MarkiTech.AI

Toronto, ON

- Streamlined frontend and backend communication, **handling 500+ daily requests** across designated websites and phone calls using REST APIs built with Node.js and Express, and Socket.IO for real-time updates
- Engineered a file system that **parses and stores schedule data for 300+ doctors** into a MongoDB schema
- Created comprehensive tests for database validation, with **30+ test cases for 4+ databases** using Jest
- Deployed the backend using Docker, and leveraged MongoDB Atlas for scalable cloud database hosting

Software Engineer

Sept 2025 – Dec 2025

African Geospace

Toronto, ON

- Implemented a folder-based shapefile upload system to validate and store geospatial data using Django REST APIs
- Integrated Gemini API to generate crop predictions for target regions, **reducing manual analysis time by 70%**
- Engineered PostgreSQL databases on Google Cloud SQL to **manage 300+ shapefiles** for spatial analytics
- Designed a grid-based spatial overlay in React.js **generating 2,500+ zones** to visualize climate and crop metrics
- Facilitated sprints for a 7-person Agile team, directly collaborating with the CEO on product strategy

PROJECTS

SportsDeck | *Next.js, React.js, Node.js, Prisma, PostgreSQL, Docker*

- Created a full-stack Premier League forum application with a responsive user interface using Next.js and React.js
- Built REST APIs using Next.js and Node.js to manage conversations, polls, and retrieve data from external APIs for **100+ matches**, and utilized Postman to test and document API responses
- Designed data schemas with **10+ models** using Prisma ORM with PostgreSQL to optimize data querying
- Containerized the application and database environment using Docker to streamline development and deployment

Audify.AI | *FastAPI, Google Cloud, Google Gemini API, OpenAI Whisper*

- Developed an AI-powered song translator that **combines translation and backing track for 10+ languages**
- Built RESTful API with FastAPI accepting audio uploads and managing jobs for transcription and translation
- Implemented OpenAI Whisper for speech-to-text with word-level timestamps for rhythm alignment
- Integrated Gemini API for 10+ parallel language translation calls, **reducing processing time by 80%**

CoverSume | *React.js, Tailwind CSS, Node.js, Express, OpenAI API, AWS, Auth0*

- Built a full-stack AI-powered resume and cover letter builder that **reduces document creation time by 90%**
- Engineered REST APIs to manage parsing of file inputs and orchestrate the PDF conversion pipeline using Node.js and Express, leveraging GPT-4o to generate complex structured LaTeX code with a **70% success rate**
- Developed a 4-page responsive website with form handling and PDF view using React.js, and Tailwind CSS
- Integrated secure logins and storage for **20+ concurrent users** using Auth0 and AWS S3

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, Python, HTML, CSS, SQL, C, C++, LaTeX

Frameworks & Libraries: React.js, Node.js, Next.js, FastAPI, Django, Express, Tailwind CSS, Jest, PyTest

Developer Tools: MongoDB, PostgreSQL, Prisma, Git, Docker, AWS, Google Cloud
